

Invitation to an International Microbiology Seminar 2005

Merck is pleased to offer a one day SEMINAR on the latest trends in MICROBIOLOGY presented by Wolfgang Schmidt, Specialist and Product Manager for Microbiology from Merck, Germany.

During the seminar a "Key-Note" address titled "Microbiology in the 21st Century – Where are we and Where are we going" (a summation of an American Academy of Microbiology Colloquium Report) will be given by Prof. T. E. Cloete, Head of the Department of Microbiology and Plant Pathology at the University of Pretoria.

Topics covered in the Seminar will include:

- **Health and Safety** aspects of working with dry microbiological media.
- **ISO 11133** and the consequences for laboratories of non compliance with this standard.
- **Microbiological Air Monitoring** - in the Food, Beverage, Pharmaceutical and Health Industries.
- **Peptones as a Growth Promoter** and comparisons of different Peptones for different bacteria. The Safety of these products.
- **Food & Water Borne Pathogens**, rapid and alternative methods of detection versus traditional methods.
